SENIOR WEB DESIGNER & FRONTEND DEVELOPER

Thoughtful design. *Made to work.*

I'm Daniel — a designer and frontend developer with 10+ years of experience turning complex ideas into clear, considered digital experiences.

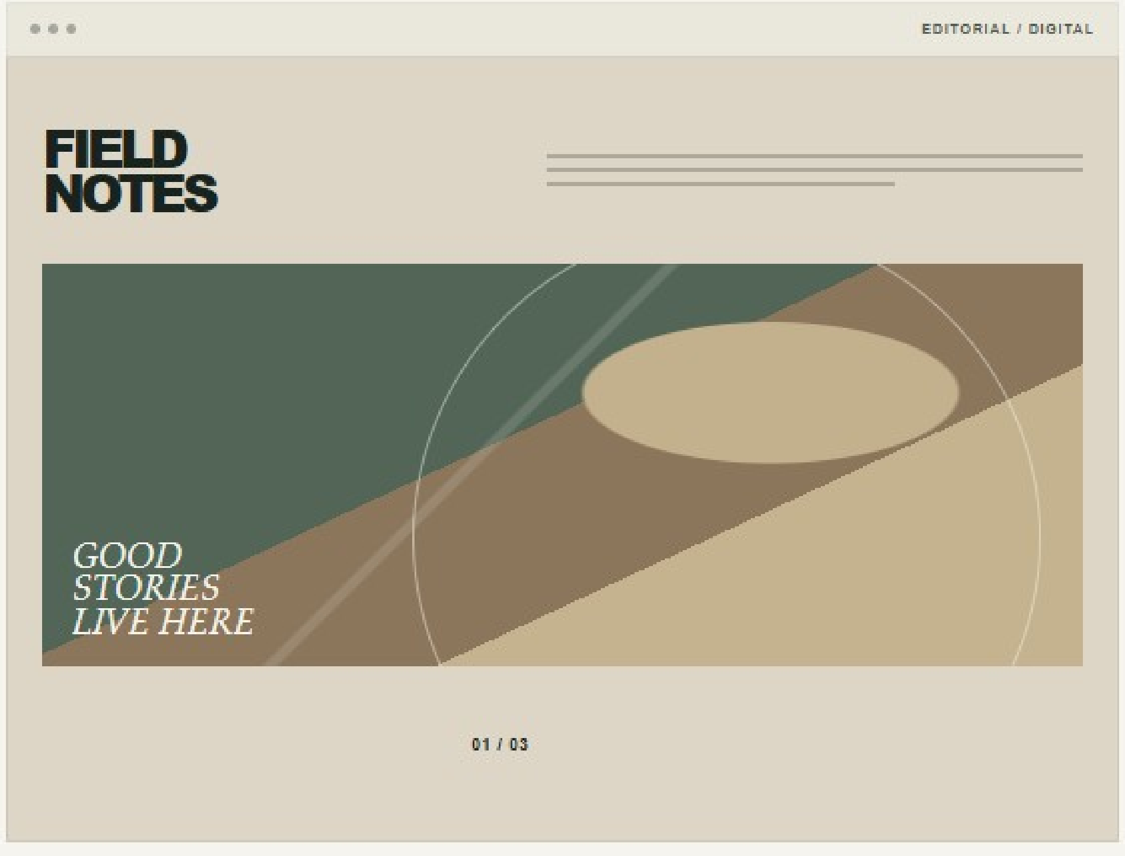
Good design, built with care ✳ *From first sketch to final pixel* ✳ *Design / Develop*

A FEW THINGS I DO WELL

Work, in practice.

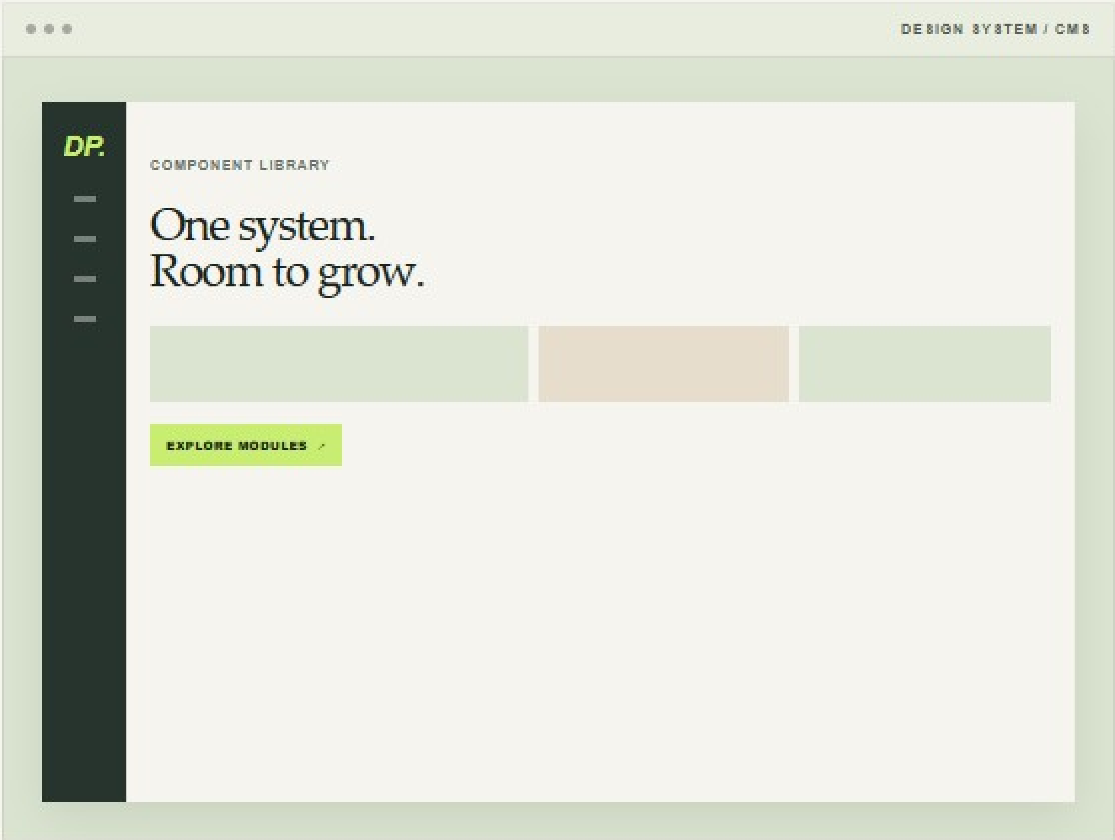
A decade of making useful, good-looking things for the web — from first idea to finished interface.



01 Digital publishing

Responsive editorial websites and digital experiences, shaped around the needs of different brands and audiences.

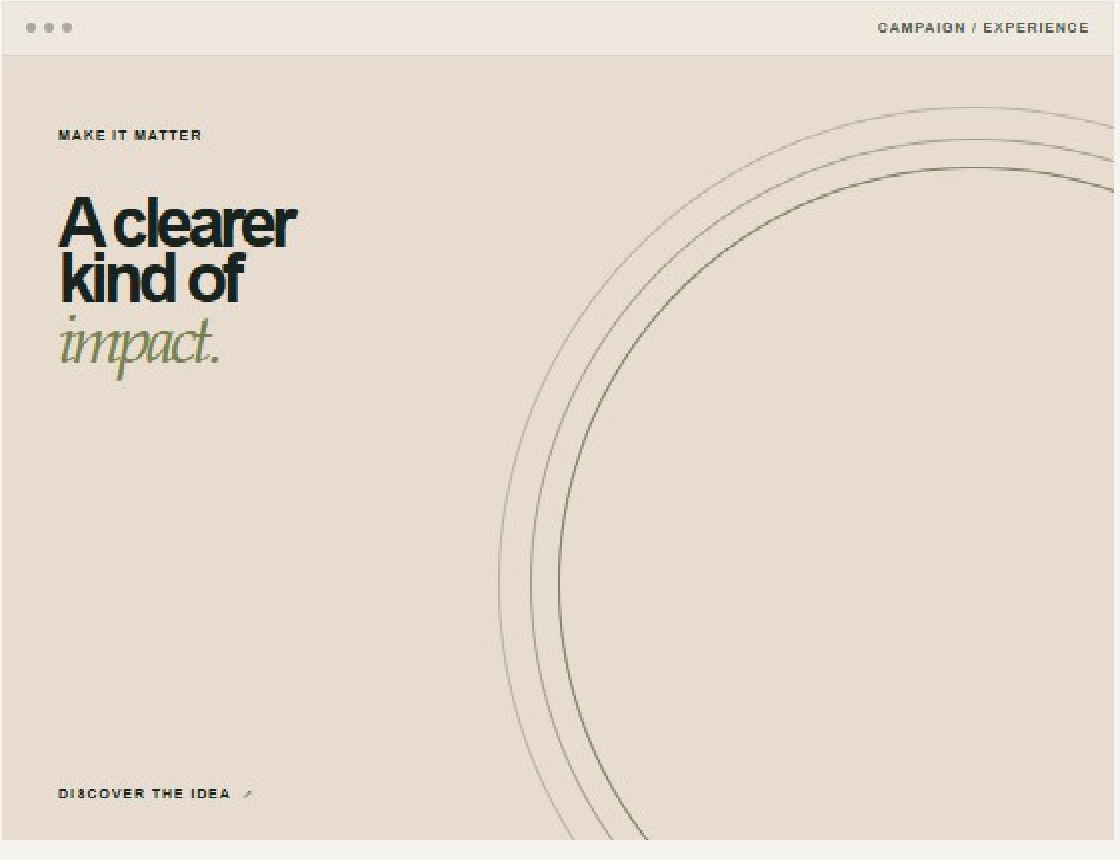
UI/UX · Responsive design · Frontend



02 WordPress systems

Custom themes, flexible page templates and reusable components that help teams publish with confidence.

WordPress · SCSS · Components



03 Campaign experiences

Landing pages brought from early wireframes and prototypes through to thoughtful, production-ready frontends.

Wireframes · Prototyping · Web design

These are areas of my practice, not client case studies. Project names and visuals can be added when they're ready to share.

A LITTLE ABOUT ME

10+

YEARS MAKING FOR THE WEB

Design-minded. *Build-focused.*

I care about how a website feels — and how well it works once it's out in the world.

For more than a decade I've worked across the full process: understanding a brief, mapping the experience, designing the interface and bringing it to life in the browser. I enjoy the space between design and development, where good ideas become useful, accessible products.

I'm currently a UI/UX Designer & Frontend Developer at Computec Media in Germany, collaborating with design, marketing and backend teams to make digital experiences better, one thoughtful detail at a time.

DESIGN ✳ DEVELOP ✳ REPEAT

THE TOOLKIT

A considered skill set.

A flexible mix of design, code and quality — applied to what the project actually needs.

01 / 03

Design

Interfaces with clarity, character and a purpose.

UI/UX design · Visual design · Wireframing · User flows · Prototyping · Design systems

02 / 03

Development

Careful frontends, built to work across screens.

HTML5 · CSS3 / SCSS · JavaScript (basics) · WordPress · Responsive design · CSS Grid / Flexbox

03 / 03

Quality

The details that make a good experience better.

Accessibility / WCAG 2.2 · Core Web Vitals · Lighthouse · SEO · Testing · Debugging
